EDUCATION

York University

BSc. Computer science

Projects

Qdrive – Full Stack File Storage Platform — [Live Demo](#)

- Developed a scalable file storage and management platform using Next.js (App Router), React 19, TypeScript, and Appwrite.
- Implemented secure authentication with Appwrite, including OTP-based verification with retry logic and auto-submit flows.
- Built file upload, preview, rename, delete, and download functionality with Appwrite Storage.
- Designed a responsive dashboard with real-time storage insights, file categorization (images, videos, documents, audio), and recent activity tracking.
- Added global search and sorting features (by size, date, name) for efficient file navigation.
- Created responsive UI using TailwindCSS and ShadCN components, optimized for both desktop and mobile.
- Structured codebase with reusable components, server actions, and utilities to demonstrate production-ready architecture.

Qflix - Full Stack Movie Search App — [Live Demo](#)

- Built a responsive movie and TV database using React, TypeScript, and Appwrite. browser locale to simplify discovery and access.
- Integrated external REST APIs to fetch trending and searchable media content in real-time.
- Designed interactive UI with dynamic poster rendering and searchable items to update backend search statistics.
- Implemented backend functions via Appwrite to track user interactions and store media metadata.
- Converted app into a Progressive Web App (PWA) for installability and offline support.
- Added region-aware provider info based on the user's browser locale.

ratstudio.co - Developed Company Website — [Live Demo](#)

- Developed a fully responsive, animated website using HTML/CSS, JavaScript, and custom media queries.
- Collaborated with a UI/UX designer to implement their design into a fully interactive, cross-browser compatible website.
- Built an interactive video scrubber synced to mouse scroll input, with auto-play fallback after inactivity, enhancing visual engagement and user control.
- Showcased game and web development work with scroll-based transitions and minimal, clean layout.
- Used PHP to handle form submissions and backend communication.
- Optimized for both desktop and mobile users with performance-focused layout decisions.
- Deployed via GoDaddy with version control through Git and GitHub.

VOLUNTEER EXPERIENCE

Peace by Peace - Teacher Training Graduate and Instructor.

- Selected for leadership training and teaching roles.
- Promoted relationship-building and problem-solving among youth.

LUMUN XI - Lahore University of Management Sciences

- Represented the Arctic Council in Model UN debates.
- Drafted resolutions and practiced diplomacy, public speaking, and critical thinking.
